Double digit math worksheets 1st grade

You are here: Home → Worksheets → Grade 1 Its a comprehensive collection of mathematical sheets to print for class 1, organized by topics such as addition, deduction, space value, time telling and money counting. They are randomly generated, can be printed from the browser and contain an answer key. Worksheets support any first-class math program, but they work particularly well with the IXL 1st grade math program. Sheets are generated randomly each time you click the links below. You can also get a new one, another one just by refreshing the page in your browser (press F5). You can print them directly from your browser window, but first check out what it looks like in Print Preview. If the worksheet doesn't match the page, adjust the margins, header, and footer in the page settings settings in the browser. Another option is to adjust the scale to 95% or 90% in print preview. Some browsers and printers have a Print to adjust option that automatically scales the worksheet to fit the print area. All sheets are equipped with an answer key located on the other side of the file. Mental Addition Students should have a 100-bead abacus or ten-block base for these double-digit addition problems. Problems can even involve regrouping or creating a new ten, but students don't solve problems by writing numbers below each other (adding in columns). The idea is to use manipulation to add. Add two 2-digit numbers using manipulative addition in the Pennies and Dimes only columns - up to 6 penny coins, nickel, and dimes only - up to 6 coins Pennies, nickel, and dimes only - up to 10 coins Pennies, nickel and dimes only - up to 15 dimes coins and quarters only - up to 6 Nickels coins and quarters only - up to 6 coins Pennies, nickel, dimes and quarters - easy Pennies , Nickel, dimes and quarters - average pennies, nickel, dimes and quarters - the challenge use these pages to make sheets for other currencies: If you want to have more control over options such as number of problems or font size or range of numbers, just click on these links to use sheet generators yourself : Learn coins: PennyLearn coins: PennyOn this penny for printing, kids practice tracking letters , counting coins and even get into some fun coloring pages. too. Click the worksheet in the set below to view more information or download the PDF. Here's a graphical preview for all addition sheets. These dynamically created addition sheets allow you to select different variables to suit your needs.
